

Illinois Association of Energy Raters and Home Performance Professionals

MENTORSHIP PROCEDURES FOR NEW HERS RATERS:

The IAERHPP is a RESNET Accredited Rating Provider for Illinois and neighboring states. Our Providership requires 3 supervised ratings completed with an approved mentor prior to acceptance as a Rater Member. This requirement is both mandated by RESNET and considered to be a major benefit to our Raters. The classroom training obtained from a certified RESNET Rater Trainer is valuable, but is not sufficient to ensure success in the real world of HERS Ratings. Our goal as a Provider is to help our membership succeed professionally and financially.

The Mentor you choose will be responsible for providing to you:

- 3 hours onsite per rating
- 2 hours REM/Rate review per rating, by phone or at a place of the Mentor's choosing
- Advanced guidance with field tools and procedures, REM/Rate reports and improvement analyses, existing home auditing, and running a successful rating and audit business.
- Validation to the IAERHPP of mentorship completion
- **and until May 31, 2010, approval of the \$600/50% Mentee rebate from the IL DCEO*

As the Mentee, you will be responsible for providing to your Mentor:

- 3 homes (1 per rating)
- ¹Equipment to complete the field testing (blower door, duct blaster, etc)
- \$400 per Mentored Rating, paid directly to the Mentor for his/her time and support
- Reasonable flexibility in scheduling the ratings and reviews, with the understanding that Mentors serve the IAERHPP in addition to running their own companies

Once your 3 supervised ratings are complete, the Mentor will verify this to the Executive Director. The membership committee will then vote to certify the Mentee as a full Rater Member of the IAERHPP. Annual dues and software license fees as described in the Membership Application will then be collected, and the new Rater Member will be added to the Rater Directory of the website, and given the full privileges thereof.

A list of accredited mentors begins on the following page.

1 If the Mentee requires the use of the Mentor's equipment, an additional fee may understandably be negotiated between Mentor and Mentee.
